

Local Company Saves You Money

**Mark, Mike, Trish & Gabe Milanese
At the Milanese Remodeling Showroom**

One local home improvement company is helping homeowners' wishes come true. Milanese Remodeling is offering low cost package prices on "Extreme Makeovers". Milanese negotiated low end-of-winter prices from the manufacturers of their most popular products and select homeowners will pay less for windows, doors, siding, awnings and patios.

Their "Backyard Makeover" includes a large 16' x 11' paver patio and a motorized retractable awning installed for only \$9,995. Milanese will install enough Vinyl Siding to refurbish most homes for only \$9,995 with their "Curb Appeal Makeover". They are also offering financing with low monthly payments for qualified buyers.

Milanese says good value is not only about low prices. "Our past clients are our best friends. We try to delight them with quality products, dependable service AND reasonable prices".

In 1957 Gabe and Jackie Milanese opened the doors of their home remodeling showroom on East Lincoln Highway in Caln Township. The Milanese family has remodeled thousands of homes and businesses in the fifty-five years since then. Their track record is amazing, especially considering the average life of a home remodeling company is less than three years.

Although Milanese Remodeling has been around forever, these special deals won't last that long. The Extreme Makeover offers are scheduled to expire April 15, 2014.

Will Winter End? Spring then Summer predicted by some...

There is rising speculation the recent months of cold weather experienced by many in the Northern United States will not last forever. Strong evidence points to climate change in the very near future.

Since December 21st the sun has been rising earlier and setting later each day. Environmentalists forecast warmer temperatures will be the consequence of the heat from the added sunlight. They say green grass, leaves and flowers are all likely to trigger the largest epi-

demic of Spring Fever in nearly a year.

Local residents may expect increased energy and vitality as well as more frequent smiles and unexpected signs of affection. The urge to spend time outdoors may overwhelm many.

We advise readers to prepare to enjoy the warm weather conditions by protecting their outdoor living space from sun and rain with an Awning from Milanese Remodeling.

Great Outdoor Living Begins...

With an Awning!

Don't let the sun and rain chase you indoors. Enjoy outdoor living with an awning. Milanese Remodeling awnings expand your living space outside and reduce energy costs inside.

Your choices are endless, but summer will be here soon. Get ready for good times and order your awning now. Don't let Mother Nature ruin your good times. Protect your fun with an Awning from Milanese Remodeling.

The Stationary Awning

Today, we offer 3-Season & 4-Season stationary fabric awnings. Stationary fabric awnings are the most affordable way to protect outdoor space from sun and rain. The fabric on 4-Season models stays on year round. 3-Season models must have the fabric removed before any chance of snow, but removing the fabric lets sun indoors during winter.

Don't forget about permanent traditional covered porches and insulated patio covers. They can be enclosed at any time to create a screen room or Patio Room.

New styles of aluminum awnings are designed with the architecture of your home in mind and will hold up to sun, wind, rain and snow.

The Retractable Awning

Retractable awnings add living space and reduce energy costs at the touch of a button. They feature self storing and maintenance free designs backed by a manufacturer lifetime frame warranty. Milanese Remodeling retractable awnings are available in large sizes and with the highest wind resistance rating in its class.

The GENNIUS Pergola & Retractable Awning

The stationary awning and the retractable awning are combined into one smart retractable roof. Join a pretty pergola framework with fabric to create a rainproof, wind proof retractable awning.

The GENNIUS is so strong it is wind rated up to 125 mph and able to cover big areas - projections up to 29'6" in unlimited widths. The 100% blackout fabric can be retracted to let light in the house in winter or to see the stars in summer. With intelligent options such as lights, speakers, heaters, misting fans, retractable walls and movie screen the GENNIUS keeps getting smarter...

Enjoy Life Outside
